**1. Panel assembling and determination of fixing places (Picture No. 1-2 and No. 5).**

- Screw hinges to the glass. The screw part of hinges should be in internal part of shower panel.
- Put the assembled panel to the wall it has to be mounted. Raise the panel from the bath by 12 mm.
- Using a level regularize make the shower panel to be settled straight. Mark the fixing positions for hinges.

*ATTENTION! Watch out for electrical cables and water and gas mains in the wall!*

**2. Fixing of panel (Picture No. 2).**

- Drill the holes for hinges/panel fixing.
- Inject the silicone into the drilled hole, put plastic parts for screw fixing.
- Embed the shower panel and fix it.

**3. Final assembling (Pictures 3 -4).**

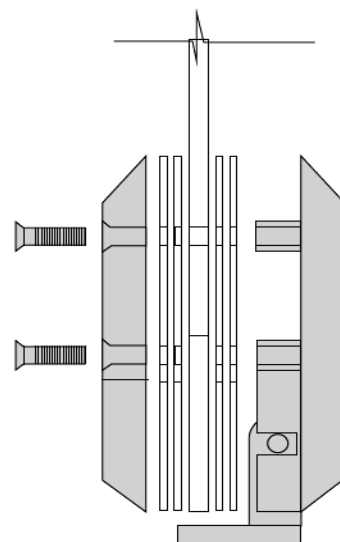

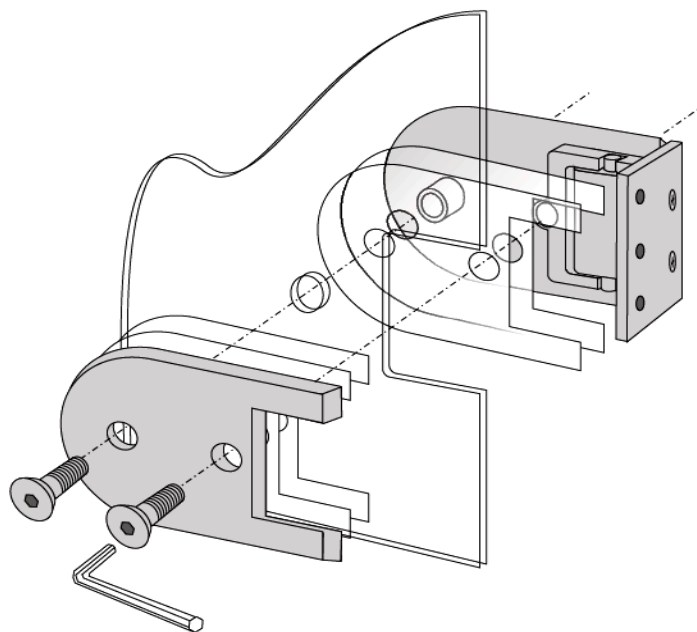

- Set vertical seals on between the glass and the wall. Cut them under the lengths needed.

*We wish you good beginning and successful ending of every new day*

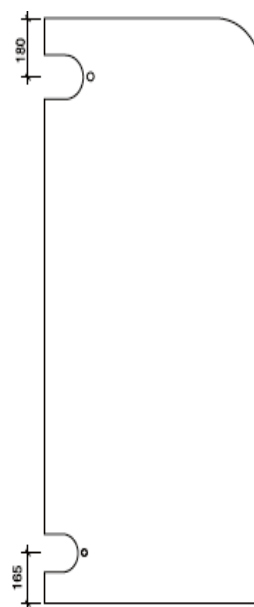

*while enjoining our products*
